Forecast for Thursday 25 Aug 2022

Weather: Cloud clearing eastwards after dawn taking with it the small chance of some light rain. A little fair weather cloud bubbling up during the day, but generally fine and dry with plenty of sunshine and generally light winds.

Chance of cloud-free hill tops above 600m: 95%.

Low cloud and visibility: There's small a risk of isolated patches of cloud around the summits around dawn, with bases of 200-300m possible but lifting and clearing quickly. There's also a small risk of some patchy mist developing in valleys before dawn, within which visibilities will be poor. After any early mist clears, visibilities will be very good with good air clarity, allowing distant hills to be visible.

*Level above which ground is expected to be frozen/snow is expected to settle.

Meteorologist's View

Although it will feel fresher compared to the last few days, there will be plenty of sunshine around with moderate UV levels, so sun protection is strongly advised.

Forecast for Friday 26 Aug 2022

Weather: Scattered cloud to start with cloud thickening into mid-morning as patchy showery rain moves in from the west, expected to remain across the park until afternoon when it will start to peter out. This rain will mostly be light, however there's a risk of the odd heavy outbreak.

Maximum wind: south-westerly becoming north-westerly, 10-15mph.

Chance of cloud-free hill tops 600m: 40% becoming 80%.

Low cloud and visibility: Cloud expected around some summits, most likely in the west through the morning until mid-afternoon, with bases of 500-700m. Largely clearing afterwards. Visibilities will be very poor within any patchy fog on the summits.

Temperature: **Valleys:** Plus 07 Celsius to Plus 18 Celsius
At 600m: Plus 07 Celsius to Plus 13 Celsius
Freezing level: Well above the summits.
